

A Mower You Can Keep in Good Cutting Order

When the cutting parts of a mower get out of better mower troubles begin—poor cutting, heavy draft and excessive wear usually result.

One of the big advantages of the John Deere Dain Mower is the ability to keep the cutting parts in good working order during the life of the mower. The next time you are in town take time to come in and let us show you why you can get good work out of our mower for years to come.

For instance, you don't have to tear down the mower or send it to a blacksmith shop to re-align the cutter bar or re-center the knife—two simple nut adjustments that can be quickly and easily made right in the field do the job. And the adjustments can be made accurately and they stay made.

Come in—it's to your advantage, to know all about this mower before you buy. While at our store, we want you to see the rest of our line of heavy and harvesting machinery. We have a line of machinery you can use with satisfaction and profit.

GAINESBORO R. 3.

I thought I would write a few lines to let my friends know how I am getting along with my five little children. I have still got them huddled around me, enjoying life the best we can under the circumstances. The sweetest hours of my life is when I have got them around me, instructing them, as best I can, how they should live, realizing as never before, the great responsibility that rests on all parents, I feel that there's a greater one on me. Only sympathy can be extended to any one. I extend sympathy to Mr. and Mrs Charley Dixon. Would say to them that the only consolation for us or any one else, is, to live like the word of God teaches and it will be like the song "All will be well after while."

Wishing the Sentinel and its many reader success, I close.

Jim Childress.
